There are risks associated with investing, including the entire loss of principal invested. As interest rates rise, the value of fixed-income securities held by the Funds are likely to decrease. Securities with longer durations tend to be more sensitive to interest rate changes, making them more volatile than securities with shorter durations. As interest rates fall, the Funds' income will decline. In addition the Funds are subject to Credit/Default Risk, Asset Class Risk, Call Risk/Prepayment Risk, Extension Risk, Liquidity Risk, Foreign Issuers Risk, Declining Yield Risk, Fluctuation of Yield and Liquidation Amount Risk, Derivative Risk, Non-Correlation Risk, Replication Management Risk, Issuer-Specific Changes, and Non-Diversified Fund Risk.
