

CLAYMORE BLUEPRINTSSM STRATEGY

International Select Dividend Strategy

SERIES 5

UNIT INVESTMENT TRUSTS

Investment Objective and Principal Investment Strategy

The International Select Dividend Strategy, Series 5 ("Trust") seeks to provide total return primarily through capital appreciation and dividend income. The Trust seeks to provide total return primarily through capital appreciation and dividend income by investing in a diversified portfolio of international equity securities listed on major U.S. exchanges. The Trust's strategy is to capture international growth potential, while applying dividend income to counterbalance global economic volatility and to insulate the Trust from further potential domestic slowdown. The Sponsor, with the assistance of Guggenheim Partners Asset Management, Inc. ("GPAM"), an affiliate of Guggenheim Partners, LLC ("Guggenheim"), has selected the securities to be included in the Trust's portfolio. The Sponsor and GPAM believe that companies that distribute significant dividends on a consistent basis demonstrate strong financial strength and positive performance relative to their peers.

GUGGENHEIM
Guggenheim Partners Asset Management, Inc. (GPAM)

PARTNER
FOCUS

Guggenheim Partners Asset Management, Inc., is a wholly-owned subsidiary of Guggenheim Partners, LLC, which offers financial services expertise within its asset management, investment advisory, capital markets, institutional finance and merchant banking business lines. Clients consist of an elite mix of individuals, family offices, endowments, foundations, insurance companies, pension plans and other institutions that together have entrusted the firm with supervision of more than \$100 billion in assets. A global diversified financial services firm, Guggenheim Partners, LLC office locations include New York, Chicago, Los Angeles, Miami, Boston, Philadelphia, St. Louis, Houston, London, Dublin, Geneva, Hong Kong, Singapore, Mumbai and Dubai.

Security Selection

The Trust's portfolio is constructed and the securities selected approximately five to seven business days prior to the initial date of deposit (the "Inception Date") using the Security Selection Rules and the Portfolio Diversification & Concentration Rules outlined below.

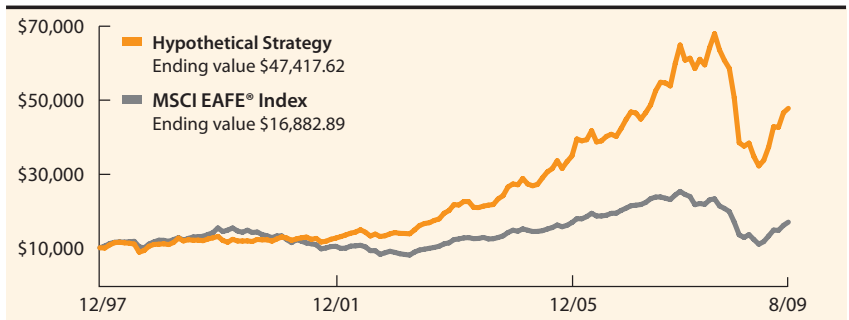

Security Selection Rules:

In constructing the Trust's portfolio, 30 securities will be selected based on the following fundamentally based quantitative criteria:

1. Start with an initial universe of securities that includes all non-U.S. domiciled companies with equity securities listed on a major U.S. exchange, including the New York Stock Exchange ("NYSE") and the NASDAQ[®] Stock Market ("NASDAQ").
2. Reduce the initial universe of securities to a sub-universe that includes all securities that meet the following requirements:
 - Market capitalization greater than \$5 billion.
 - Free float over 20% of common shares outstanding. Free float is defined as an estimate of the proportion of shares without sales restrictions that are not held by Large Owners (defined as those owners required to make a filing with the Securities and Exchange Commission under Section 13(d) of the Securities Exchange Act of 1934 due to owning more than 5% of any class of a company's shares).

SECURITY SELECTION CONTINUED ON NEXT PAGE

HYPOTHETICAL STRATEGY GROWTH OF \$10,000 VS. MSCI EAFE[®] INDEX (12/31/97 - 8/31/09)

Source: Claymore Securities, Inc.

Growth of \$10,000 chart represents a hypothetical \$10,000 investment in the strategy (not any actual Trust) and the MSCI EAFE[®] Index from December 31, 1997 through August 31, 2009. The graph is based on monthly net returns, assuming the initial investment of \$10,000. All dividends during a month, including those on stocks trading ex-dividend as of the last day of the month, are assumed to be reinvested at the end of that month. These hypothetical results represent past performance of the strategy and not the actual Trust. Hypothetical performance is based on the assumption that the portfolio reconstitution would have occurred annually. It is also assumed that the investment is liquidated at the end of the time series shown here, resulting in application of relevant fees and charges. Past performance does not guarantee future results.

HYPOTHETICAL STRATEGY AVERAGE ANNUAL TOTAL RETURN VS. MSCI EAFE[®] INDEX (THROUGH 12/31/08)

Year	Hypothetical Strategy	MSCI EAFE [®] Index
10-Year	13.15%	1.18%
5-Year	11.82%	2.10%
3-Year	2.86%	-6.92%
1-Year	-38.08%	-43.06%

Source: Claymore Securities, Inc.

Average annual total return measures the change in the value of an investment assuming reinvestment of all dividends and capital gains and payment of applicable Trust expenses and sales charges. Average annual total returns are for the periods noted through 12/31/08. These hypothetical results represent past performance of the strategy and not the actual Trust. Past performance does not guarantee future results. There can be no assurance that the Trust will achieve better performance than the MSCI EAFE[®] Index, or over rollover periods, if available.

All strategy performance is hypothetical (not any actual Trust) and reflects Trust sales charges (full sales charge in first year of 2.95% and reduced rollover charge thereafter of 1.95%) and expenses but not brokerage commissions on stocks or taxes. Hypothetical performance is based on the assumption that the portfolio reconstitution would have occurred annually. Past performance is no guarantee of future results. Actual returns will vary from hypothetical strategy returns due to timing differences and because the Trust may not be invested equally in all stocks or be fully invested at all times. In any given year the strategy may lose money or underperform the Index. Monthly gross returns are calculated by taking month-end prices, subtracting them from the prices at the end of the following month (adjusting for any stock splits that might have occurred during the month) and adding dividends (in the case of total returns) received for the period divided by starting price. High returns are highly unusual and cannot be sustained. Investors should also be aware that these returns were primarily achieved during favorable market conditions.

The MSCI EAFE[®] Index (Europe, Australasia, Far East) is a free float-adjusted market-capitalization Index that is designed to measure developed market equity performance of 21 developed market country indices within Europe, Australasia, and the Far East, excluding the United States and Canada.

Indices are statistical composites and their returns do not include payment of any sales charges or fees an investor would pay to purchase the securities they represent. Such costs would lower performance. This index is unmanaged and it is not possible to invest directly in this index. The historical performance of the Index is shown for illustrative purposes only; it is not meant to forecast, imply or guarantee the future performance of any particular investment or the Trust, which will vary. Securities in which the Trust invests may differ from those in the index. The Trust will not try to replicate the performance of these indices and will not necessarily invest any substantial portion of its assets in securities in the Index. There is no guarantee that the perceived intrinsic value of a security will be realized.

Security Selection (continued)

- Minimum one-year price history for each non-U.S. domiciled company's equity security traded on a major U.S. exchange, including the NYSE and NASDAQ, as of the date of selection.
 - Minimum three-year price history for each non-U.S. domiciled company's equity security traded on the company's local, foreign exchange, as of the date of selection.
 - Duplication screen so that in the event a parent company has multiple classes of securities that meet the above criteria, the class that has the greatest market capitalization is considered for final selection.
3. Dividend Yield Rule: Select from the sub-universe above the 30 securities, as of the date of selection, with the highest average 12-quarter dividend yield, which, during such time, have had consistent annual dividend yields greater than the median dividend yield of the securities in the sub-universe for any given year.

Portfolio Diversification & Concentration Rules:

The Trust's portfolio will consist of 30 securities using the Security Selection Rules outlined above that also satisfy the Portfolio Diversification & Concentration Rules below:

1. Sector Diversification: The Trust's portfolio must consist of securities from a minimum of six of the Global Industry Classification Standards ("GICS") sectors, with no more than 25% of the Trust's portfolio in any single GICS sector as of the date of selection.
2. Geographical Diversification: The Trust's portfolio must consist of securities from companies headquartered in at least 10 different countries with no more than approximately 20% of the Trust's portfolio from any single country as of the date of selection.

In the event that any diversification or concentration limit is breached in the construction of the Trust's portfolio, the lowest dividend-yielding security that breached the limit is removed and the Dividend Yield Rule is reapplied until a portfolio of 30 securities is generated that satisfies both the Security Selection Rules and the Portfolio Diversification & Concentration Rules.

HYPOTHETICAL STRATEGY ANNUAL TOTAL RETURNS* VS. MSCI EAFE® INDEX

Annual total returns are calculated using closing prices beginning 12/31 the previous year and ending 12/31 the stated year, for the noted 1-year period.

Year**	Hypothetical Strategy	MSCI EAFE® Index
1998	9.57%	20.33%
1999	19.24%	27.30%
2000	-5.32%	-13.96%
2001	1.91%	-21.21%
2002	11.68%	-15.66%
2003	53.19%	39.17%
2004	25.75%	20.70%
2005	27.73%	14.02%
2006	34.08%	26.86%
2007	31.08%	11.63%
2008	-37.43%	-43.06%
8/31/09	24.48%	24.81%

Source: Claymore Securities, Inc.

* Total return measures change in the value of an investment assuming reinvestment of all dividends and capital gains. These hypothetical results represent past performance of the strategy and not the actual Trust. Past performance does not guarantee future results. There can be no assurance that the Trust will achieve better performance than the MSCI EAFE® Index or over any investment period in the Trust or over rollover periods, if available.

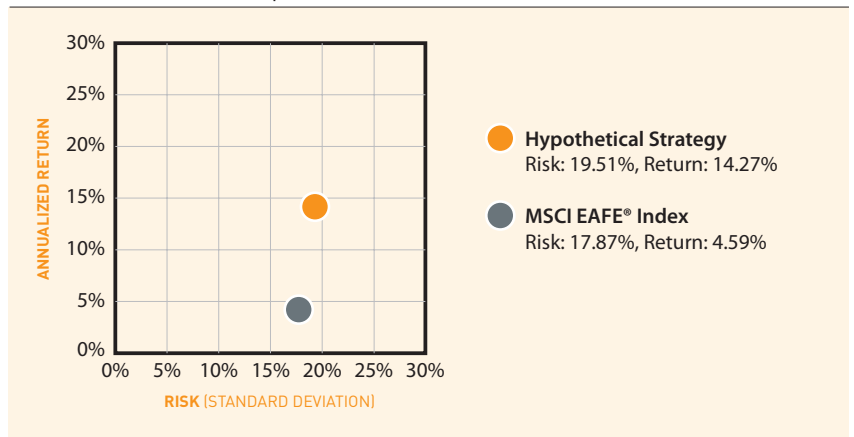

**It is assumed that the investment is liquidated at the end of the time series shown here, resulting in application of relevant fees and charges.

All strategy performance is hypothetical (not any actual Trust) and reflects Trust sales charges (full sales charge in first year of 2.95% and reduced rollover charge thereafter of 1.95%) and expenses but not brokerage commissions on stocks or taxes. Hypothetical performance is based on the assumption that the portfolio reconstitution would have occurred annually. Past performance is no guarantee of future results. Actual returns will vary from hypothetical strategy returns due to timing differences and because the Trust may not be invested equally in all stocks or be fully invested at all times. In any given year the strategy may lose money or underperform the Index. Monthly gross returns are calculated by taking month-end prices, subtracting them from the prices at the end of the following month (adjusting for any stock splits that might have occurred during the month) and adding dividends (in the case of total returns) received for the period divided by starting price. High returns are highly unusual and cannot be sustained. Investors should also be aware that these returns were primarily achieved during favorable market conditions.

There is no guarantee the strategy will outperform the Index. The Index is a statistical composite and its returns do not include payment of any sales charges or fees an investor would pay to purchase the securities they represent. Such costs would lower performance. It is not possible to invest directly in an index. The historical performance of the Index is shown for illustrative purposes only; it is not meant to forecast, imply or guarantee the future performance of any particular investment or the Trust, which will vary. Securities in which the Trust invests may differ from those in the Index. The Trust will not try to replicate the performance of the Index and will not necessarily invest any substantial portion of its assets in securities in the Index. There is no guarantee that the perceived intrinsic value of a security will be realized.

HYPOTHETICAL STRATEGY HISTORICAL RISK/RETURN VS. MSCI EAFE® INDEX

Annualized data for the time period 12/31/97 - 8/31/09

Source: Claymore Securities, Inc.

HYPOTHETICAL STRATEGY VS. MSCI EAFE® INDEX RISK ANALYSIS¹

Life of Strategy (12/31/97 to 8/31/09)	Hypothetical Strategy	MSCI EAFE® Index
Standard Deviation	19.51%	17.87%
Sharpe Ratio	0.56	0.07
Alpha	10.15%	0.00%
Beta	0.92	1.00
Up-Market Capture Ratio	113.34%	100.00%
Down-Market Capture Ratio	77.77%	100.00%

Past performance does not guarantee future results. It is not possible to invest directly in an index.

PORTFOLIO CHARACTERISTIC DEFINITIONS

Standard deviation is a statistical measurement that depicts how widely returns vary over a given period of time. The measurement is generally used to understand the range of returns that are most likely for a given portfolio. Generally, a higher standard deviation indicates a more risky portfolio.

Sharpe ratio is a measure of reward per unit of risk. A higher Sharpe ratio indicates outperformance on a historical risk-adjusted performance basis, while a lower Sharpe ratio indicates underperformance on a historical risk-adjusted performance basis.

Alpha is a statistical measurement that depicts the performance difference between a portfolio's return and an underlying performance benchmark, given the portfolio's level of volatility, measured by beta. The benchmark index will always reflect an alpha of 0.00%. A positive alpha indicates a portfolio has performed better than its beta would predict in the stated period.

Beta is the measure of a portfolio's sensitivity to the Index. By definition, the beta of the Index is 1.00. Any portfolio with a higher beta is more volatile than the Index. Likewise, any portfolio with a lower beta will be less volatile than the Index in the stated period.

The **up-market capture ratio** is a measure of a portfolio in up-markets relative to the Index during the same period. A ratio value of 115 indicates that the portfolio has outperformed the market index by 15% in periods when the Index has risen.

The **down-market capture ratio** is the direct opposite of the up-market capture ratio, gauging performance of the portfolio relative to the Index in down-markets. A ratio value of 80 would indicate the portfolio has declined only 80% as much as the declining overall market, indicating relative outperformance.

Long-Term Strategy

This UIT is part of a long-term strategy. Please consider your ability to invest in successive portfolios, if available, at the applicable sales charge. Call your financial professional today or visit claymore.com to learn more.

RISK CONSIDERATIONS As with all investments, you may lose some or all of your investment in the Trust. No assurance can be given that the Trust's investment objective will be achieved. The Trust also might not perform as well as you expect. This can happen for reasons such as these: **Securities prices can be volatile.** The value of your investment may fall over time. Market value fluctuates in response to various factors. These can include stock market movements, purchases or sales of securities by the Trust, government policies, litigation, and changes in interest rates, inflation, the financial condition of the securities' issuer or even perceptions of the issuer. Units of the Trust are not deposits of any bank and are not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. **Due to the current state of the economy, the value of the securities held by the Trust may be subject to steep declines or increased volatility due to changes in performance or perception of the issuers.** In the last year, economic activity has declined across all sectors of the economy, and the United States is experiencing increased unemployment. The current economic crisis has affected the global economy with European and Asian markets also suffering historic losses. Extraordinary steps have been taken by the governments of several leading economic countries to combat the economic crisis; however, the impact of these measures is not yet known and cannot be predicted. **Share prices or dividend rates on the securities in the Trust may decline during the life of the Trust.** There is no guarantee that the issuers of the securities will declare dividends in the future and, if declared, whether they will remain at current levels or increase over time. **The Trust invests in U.S.-listed foreign securities and American Depositary Receipts ("ADRs").** The Trust's investment in U.S.-listed foreign securities and ADRs presents additional risk. ADRs are issued by a bank or trust company to evidence ownership of underlying securities issued by foreign corporations. Securities of foreign issuers present risks beyond those of domestic securities. More specifically, foreign risk is the risk that foreign securities will be more volatile than U.S. securities due to such factors as adverse economic, currency, political, social or regulatory developments in a country, including government seizure of assets, excessive taxation, limitations on the use or transfer of assets, the lack of liquidity or regulatory controls with respect to certain industries or differing legal and/or accounting standards. **The Trust includes securities issued by companies headquartered or incorporated in countries considered to be emerging markets.** Emerging markets are generally defined as countries with low per capita income in the initial stages of their industrialization cycles. Risks of investing in developing or emerging countries include the possibility of investment and trading limitations, liquidity concerns, delays and disruptions in settlement transactions, political uncertainties and dependence on international trade and development assistance. Companies headquartered in emerging market countries may be exposed to greater volatility and market risk. **The Trust may invest in companies that are considered to be passive foreign investment companies ("PFICs").** In general, PFICs are certain non-U.S. corporations that receive at least 75% of their annual gross income from passive sources (such as interest, dividends, certain rents and royalties or capital gains) or that hold at least 50% of their assets in investments producing such passive income. As a result of an investment in PFICs, the Trust could be subject to U.S. federal income tax and additional interest charges on gains and certain distributions with respect to those equity interests, even if all the income or gain is distributed to its unitholders in a timely manner. The Trust will not be able to pass through to its unitholders any credit or deduction for such taxes. **Inflation may lead to a decrease in the value of assets or income from investments. The Sponsor does not actively manage the portfolio.** The Trust will generally hold, and may continue to buy, the same securities even though a security's outlook, market value or yield may have changed. **Please see the Trust prospectus for more complete risk information.**

PORTFOLIO SUMMARY

Inception Date	October 1, 2009
Termination Date	January 3, 2011
Initial Offer Price	\$10.00
Minimum Investment	\$250.00
Number of Issues	30
Historical Annual Dividend Distributions	\$0.4625
Distributions*	25th day of each month commencing on October 25, 2009, if any

*The amount of distributions of the Trust may be lower or greater than the above-stated amount due to certain factors that may include, but are not limited to, a change in the dividends paid by issuers, a change in Trust expenses or the sale or maturity of securities in the portfolio. Fees and expenses of the Trust may vary as a result of a variety of factors including the Trust's size, redemption activity, brokerage and other transaction costs and extraordinary expenses.

TICKETING INFORMATION

CUSIP (cash payment)	18387F804
CUSIP (reinvestment accounts)	18387F812
CUSIP (fee-cash)	18387F820
CUSIP (fee-reinvest)	18387F838
Ticker	CMVPEX

SALES CHARGES

Sales Charge ("S/C") is based on a \$10 per unit offering price.

	Amount Per Unit	Max Per Unit %
Up-front S/C	\$0.100	1.00%
Year One Deferred S/C	\$0.145	1.45%
Creation and Development ("C&D") Fee	\$0.050	0.50%
Total S/C	\$0.295	2.95%

The deferred sales charge ("DSC") will be deducted in monthly installments on the last business day commencing February 2010 and ending April 2010. If units are redeemed prior to the DSC period, the entire DSC will be collected.

For unit prices other than \$10, percentages of initial sales charge, C&D fees, and deferred sales charges will vary. Early redemption of units will still cause payment of the deferred sales charge.

VOLUME DISCOUNT BREAKPOINTS

Purchase Amount	Sales Charge Reductions (as a % of the Public Offering Price)
Less than \$50,000	0.00%
\$50,000 - \$99,999	0.25%
\$100,000 - \$249,999	0.50%
\$250,000 - \$499,999	0.75%
\$500,000 - \$999,999	1.00%
\$1,000,000 or more	1.50%

UITs are fixed and not actively managed. An investment in this fixed portfolio should be made with an understanding of the risks involved with owning various types of investments. Industry predictions may not materialize and securities selected for the Trust may not participate in overall industry growth, if any. There is no guarantee that the portfolio will achieve its investment objective. Units, when redeemed, may be worth more or less than their original purchase price.

This UIT is part of a long-term strategy, and investors should consider their ability to invest in successive portfolios, if available, at the applicable sales charge. There are tax consequences associated with an investment from one series to the next. Investors should consult their tax advisor to determine tax consequences associated with an investment from one portfolio to the next. Units of the portfolio may be well suited for purchase by Individual Retirement Accounts or other qualified retirement plans. Consult an attorney or tax advisor regarding tax consequences associated with the purchase of units. Claymore Securities, Inc. does not offer tax advice.
