

# New Jersey Municipal Portfolio of CEFs, Series 9

## Investment Objective

The New Jersey Municipal Portfolio of CEFs, Series 9 ("Trust") seeks to provide current income and the potential for capital appreciation.

## Trust Highlights

- The Trust contains common shares of closed-end investment companies ("closed-end funds"), the majority of which contain portfolios that are concentrated in New Jersey municipal bonds, which are rated investment-grade by at least one nationally recognized statistical rating organization.

Income may be subject to state and local taxes as well as the alternative minimum tax. Capital gains, if any, may also be subject to tax. To the extent that any of the underlying closed-end funds invest in anything other than municipal securities, investors may be subject to federal taxes as well.

## Advantages of Closed-End Funds

Many closed-end funds are designed to periodically distribute income to shareholders. In addition, historically, closed-end funds have traded at a discount to their net asset value and their structure allows for the employment of leverage. These features may help investors realize enhanced total returns.\* Other advantages of closed-end funds include:

- Exchange listing
- Price visibility
- Intra-day trading
- Professional management

As a professionally-selected, defined and fixed portfolio of managed closed-end funds, the Trust may provide an extra degree of diversification for those investors seeking monthly income potential.\*\*

\*There is increased volatility associated with investing in leveraged funds.

\*\*Despite broad diversification, it is important to note that certain closed-end funds selected for the portfolio invest in bonds rated below investment-grade (sometimes referred to as "junk bonds"). These bonds are considered speculative and are traditionally subject to greater credit risk and, therefore, their risk of default may be greater than normal. As such, it is possible that the income streams provided by these closed-end funds may experience less stability than other investments.

## RISK CONSIDERATIONS As with all investments, you may lose some or all of your investment in the Trust. No assurance can be given that the Trust's investment objective will be achieved.

The Trust also might not perform as well as you expect. This can happen for reasons such as these: • Securities prices can be volatile. • Due to the current state of the economy, the value of the securities held by the Trust may be subject to steep declines or increased volatility due to changes in performance or perception of the issuers. • The Trust includes closed-end funds which are subject to various risks, including management's ability to meet the closed-end fund's investment objective and to manage the closed-end fund's portfolio during periods of market turmoil and as investors' perceptions regarding closed-end funds or their underlying investments change. Closed-end funds are not redeemable at the option of the shareholder and they may trade in the market at a discount to their net asset value. Closed-end funds may also employ the use of leverage which increases risk and volatility. • The value of the fixed-income securities in the closed-end funds will generally fall if interest rates, in general, rise. • A closed-end fund or an issuer of securities held by a closed-end fund may be unwilling or unable to make principal payments and/or to declare distributions in the future, may call a security before its stated maturity, or may reduce the level of distributions declared. • The financial condition of a closed-end fund or an issuer of securities held by a closed-end fund may worsen, resulting in a reduction in the value of your units. • Certain closed-end funds held by the Trust invest in bonds that are rated below investment-grade and are considered to be "junk" securities, speculative and are subject to greater market volatility and credit risks. • Certain closed-end funds held by the Trust may invest in bonds that are rated as investment-grade by only one

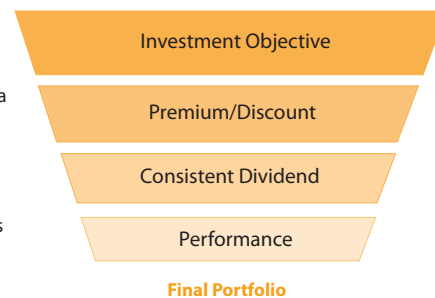

## Security Selection

The Sponsor has selected for the portfolio closed-end funds believed to have the best potential to achieve the Trust's investment objective. The Trust seeks to provide monthly income that is exempt from federal and New Jersey state income taxes by investing in closed-end funds that invest in New Jersey municipal bonds.

Municipal bonds generally offer investors the potential for stable tax-free income. However, a portion of the income may be subject to the alternative minimum tax as well as federal, state and local taxes.

When selecting closed-end funds for inclusion in this portfolio the Sponsor looks at numerous factors. These factors include, but are not limited to:

- Investment Objective.** The Sponsor favors funds that have a clear investment objective in line with the Trust's objective and, based upon a review of publicly available information, appear to be maintaining it.
- Premium/Discount.** The Sponsor favors funds that are trading at a discount relative to their peers and relative to their long-term average.
- Consistent Dividend.** The Sponsor favors funds that have a history of paying a consistent and competitive dividend.
- Performance.** The Sponsor favors funds that have a history of strong relative performance (based on market price and net asset value) when compared to their peers and an applicable benchmark.

rating agency. As a result, such split-rated securities may have more speculative characteristics and are subject to a greater risk of default than securities rated as investment-grade by more than one rating agency. • Closed-end funds held by the Trust invest in New Jersey municipal bonds. Municipal bonds are long-term fixed-rate debt obligations that decline in value with increases in interest rates, an issuer's worsening financial condition, a drop in bond ratings or when there is a decrease in the federal income tax rate. Typically, bonds with longer periods before maturity are more sensitive to interest rate changes. Municipal bonds generally generate income exempt from federal income taxation, but may be subject to the alternative minimum tax. In addition, some or all of the income generated by a closed-end fund may not be exempt from regular federal or New Jersey state income taxes and as a result, the related income paid by the Trust may also be subject to regular federal and state income taxes. Capital gains, if any, may be subject to tax. Because the closed-end funds are concentrated in bonds of issuers located in New Jersey, there may be more risk than if the bonds were issued by issuers located in several states. • Current economic conditions may lead to limited liquidity and greater volatility. • Inflation may lead to a decrease in the value of assets or income from investments. • The Sponsor does not actively manage the portfolio. • **Please note** that the Sponsor or an affiliate may be engaged as a service provider to certain closed-end funds held by the Trust and, therefore, certain fees paid by the Trust to such closed-end funds will be paid to the Sponsor or an affiliate for its services to such closed-end funds. **In addition to the expenses of the units of the Trust, the Trust is subject to various expenses of closed-end funds. Please see the Trust prospectus for more complete risk information.**

**RISK CONSIDERATIONS (CONTINUED)** Unit Investment Trusts ("UITs") are fixed and not actively managed. An investment in this fixed portfolio should be made with an understanding of the risks involved with owning various types of investments. Industry predictions may not materialize and securities selected for the Trust may not participate in overall industry growth, if any. Units, when redeemed, may be worth more or less than their original purchase price.

This UIT is part of a long-term strategy. Consult an attorney or tax advisor regarding tax consequences associated with an investment from one series to the next, if available. Investors should consult their tax advisor to determine tax consequences associated with the purchase or sale of units.
