Performance data quoted represents past performance, which is no guarantee of future results, and current performance may be lower or higher than the figures shown. Since Inception returns assume a purchase of common shares at the initial offering price of \$15.00 per share for market price returns or initial net asset value (NAV) of \$14.33 per share for NAV returns. Returns for periods of less than one year are not annualized. All distributions are assumed to be reinvested either in accordance with the dividend reinvestment plan (DRIP) for market price returns or NAV for NAV returns. Until the DRIP price is available from the Plan Agent, the market price returns reflect the reinvestment at the closing market price on the last business day of the month. Once the DRIP is available around mid-month, the market price returns are updated to reflect reinvestment at the DRIP price.

CREDIT QUALITY as of 12/31/2011

Ratings shown are assigned by one or more Nationally Recognized Statistical Credit Rating Organizations ("NRSRO"), such as Standard & Poor's, Moody's and Fitch. The ratings are an indication of an issuer's creditworthiness and typically range from AAA or Aaa (highest) to D (lowest). When two or more ratings are available, the highest rating is used; and when only one is available, that rating is used. The Non-Rated category consists of securities that have not been rated by an NRSRO. U.S. Treasury securities and U.S. Government Agency securities are not rated but deemed to be equivalent to securities rated AAA/Aaa. The credit quality of the investments in the Fund's portfolio does not apply to the stability or safety of the Fund. Please note, the Fund itself has not been rated by an independent rating agency. Credit quality, as rated by S&P, Moody's or Fitch, is an assessment of the credit worthiness of an issuer of the underlying security and not the Fund or its shares. Ratings are subject to change.
